

Special 2006 Post-Season Rules for SAS Sportsman Cars, THR Street Stock Cars and CCS Super Street Cars

San Antonio Speedway Sportsman Cars

Option 1 - Must follow all 2006 SAS Sportsman rules with only two exceptions being:

- Total weight after race will be a minimum of 3300 pounds – maximum 55% left side weight and minimum 1485 pounds right side weight
- 4412 Holley (500cfm) must be run with a carburetor spacer of not more than 1.250-inch in height, including gaskets. The holes in the spacer must be the same dimensions from top to bottom of opening (no tapered hole spacers.)

Option 2 - Must follow all 2006 SAS Sportsman rules with the following exceptions:

- Total weight after race will be a minimum of 3200 pounds
- Maximum 55% left side weight and minimum 1440 pounds right side weight
- Rear ends may be locked
- No ride height rule
- 7448 Holley (350 cfm) box stock only will be allowed

Thunder Hill Raceway Street Stock Cars

- Must follow all 2006 THR Street Stock rules with the following exceptions:
- Total weight after race will be a minimum of 3300 pounds
- Maximum 55% left side weight and minimum 1440 pounds right side weight
- No rear percentage rule
- Rear ends may be locked
- No ride height rule

Corpus Christi Motor Speedway Super Street Cars

- Must follow all 2006 CCMS Super Street rules with the following exceptions:
- Total weight after race will be a minimum of 3250 pounds
- Maximum 55% left side weight and minimum 1462 pounds right side weight

Tire Rule

- American Racer 8.0/27.0-15 or 970 8.0/26.5-15 Slick
- Hoosier 970 8.0/27.0-15 or 970 8.0/26.5-15

No Hybrids

Note: All teams must declare what track rules they are running and must comply with those rules and the exceptions and options listed above. No hybrids or mixing of tracks/options.

Official Rulings

Decisions and rules interpretations by Race Officials are final. No equipment should be considered as approved if not detected in technical inspections.
